Data Analysis

Tools
Git • Xcode
Android Studio

Practices
Code Review
Pull Requests • Agile
AI-assisted Development

LANGUAGES

Polish — Native
English — Fluent
Swedish — Communicative

Mobile Developer | iOS • Android • React Native

PROFILE

Early-career Mobile Developer with hands-on experience in a production digital health application for iOS and Android. At MedBeat I implement features, fix bugs and collaborate through pull requests and code reviews, and I contribute to a US market pre-study. I also build with React Native, TypeScript and Expo, with experience taking mobile products through App Store and Google Play release. Product-minded, shaped by years of running real businesses, and ready to grow into broader software and product engineering.

PROJECTS

Stafflyx – Hospitality Staffing Platform

- Developed a cross-platform mobile application using React Native, TypeScript and Expo
- Integrated Supabase for authentication, database and backend functionality
- Built and tested product features across worker and business workflows
- Took the app through development, testing and release processes for Apple App Store and Google Play

React Native • TypeScript • Expo • Supabase

MassageTime – Mobile Application (Live on App Store)

- Built and launched a mobile app based on real business operations, published on the Apple App Store
- Designed booking and scheduling flows used in daily real-world workflow
- Translated real user needs into a structured mobile product
- Developed UI, navigation and app architecture, prepared for API integration and future scaling

Kotlin • Jetpack Compose

Daily Inspiration – iOS Application (Team Project, Live on App Store)

- Technical lead — defined app structure and navigation
- Implemented local notifications and reminders
- Built favourites feature with persistent storage
- Added localisation (English & Swedish)

SwiftUI

PROFESSIONAL EXPERIENCE

Mobile Developer Intern (LIA) – MedBeat

05/2026 – Present

- Contribute to the development of a production digital health application for iOS and Android
- Implement new features, fix bugs and improve existing functionality
- Participate in pull requests and code reviews as part of an Agile development team
- Contribute to a US market pre-study, analysing authentication, activation flows, HIPAA requirements, security and technical architecture

SwiftUI • Kotlin • Jetpack Compose • Git • Agile • Pull Requests • Code Review

Owner – Massage Therapy Studio, Limhamn

05/2024 – Present

- Run and manage a real-world service business
- Work directly with users — understanding behaviour and needs
